

FM Security Service Overview

FM Security are experts in the provision of bespoke and off the shelf Construction site security and CCTV solutions. This brochure provides details on the various security options and services available. Our bespoke solutions are personally tailored to fit your needs providing security that delivers the way you want. The following options can be mixed and matched to suit your sites needs.

Monitored Construction Site Alarm Systems

Professionally monitored Intruder detection

A proven intruder detection system with wireless long range devices. Can be used with any of our other services.

- * Detection, response, service and CCTV in one package
- * Detectors can be placed up to 500m from the control
- * Silent alarm or Siren option available
- * Monitored 24Hrs for alarm activation and service requirements
- * Optional inclusive pricing to include Service visits and call out packages
- * Rapid deployment and installation
- * No mains supply or telephone line required

Remote CCTV Access via Tablet & Smart phone

Gain live access to CCTV footage direct from your own site using any Apple or Android Tablet / Smart phone. This service is simple to setup and comes free of charge with all our 3G and Broadband CCTV systems wether they are monitored professionally or not.

- * Free service to all CCTV/Alarm customers
- * See your site live at any time of day
- * Retrieve recorded CCTV footage on demand
- * Easy to setup and simple to use
- * Control and switch cameras views
- * An excellent and easy way to check on site progress
- * Log in from anywhere in the world

Monitored CCTV Systems

Professionally monitored CCTV Video

This can be used as an add on to our Construction site alarm systems or as a stand alone solution.

- * High quality cameras in 960H, 720P or 1080P resolutions
- * Broadband or 3G (mobile device) operation
- * Installed and tested by experienced engineers
- * Expert CCTV monitoring provided by a dedicated control room
- * Bespoke options to suit your site

On Site Audio Warning

Monitored CCTV has the option of an additional PA sounder unit to deliver a 'live' warning to any intruders seen on site. Operators can speak directly to intruders via the CCTV.

- * Live or Pre recorded audio warning system
- * Powerful PA speaker
- * Excellent deterrent
- * Multiple sounders can cover a larger area
- * Speak directly to intruders

Office view - Camera control

With our broadband CCTV systems you can view a site from your office, home or meeting place with complete control.

Check on the day to day progress of the site or use in combination with a PTZ (Pan, Tilt, Zoom) camera to focus in on a particular part of the build.

Office view gives you complete control of the on site CCTV from anywhere.

- * View cameras remotely from you office or meeting place
- * Option to control a PTZ camera through 360 degrees
- * Zoom in and focus on your build
- * Check on progress or view saved footage
- * Visit site from the office

Fire alarm system

These wireless call points and smoke detectors can be used in combination with our alarm systems, monitored CCTV products or as a completely stand alone system. The units can be monitored to provide an emergency response via the fire brigade or as a bells only site wide indication. The units are linked, monitored and regularly serviced to provide expert cover in the event of a fire.

- * Completely wireless call points and smoke detectors
- * Linked alert system (Trigger one unit all units sound)
- * Fire system can be split into separate linked areas
- * Monitored or non monitored options
- * Emergency '999' fire brigade response

Time lapse video service

Get a video of your build from ground works to completion with our time lapse video service. Images from an angle of your choice are stitched together to create a time lapse video showing your site progress from ground level to occupation.

- * Time lapse video showing build progression
- * Great marketing tool for sales
- * Include a build video on your website
- * See the build status at any stage

Text control for alarm activation

Use any mobile phone to activate and deactivate your alarm system. Authorise staff using their specific mobile phone numbers.

- * Allows authorised personnel to control the alarm system
- * Authorise individual phone numbers / people to open and close site
- * Flexible and remotely programmable
- * Secure method of alarm control
- * Can advise site manager of site access via text message
